

Yusan Nuwarawewa

Home : Panadura, Sri Lanka

Email: reach.yusan@gmail.com **Phone:** (+94) 767608448

Website: https://yusan-portfolio.vercel.app/ **LinkedIn:** Yusan Nuwarawewa

Gender: Male **Date of birth:** 30 Apr 2002 **Nationality:** Sri Lankan

EDUCATION AND TRAINING

[7 Jan 2023 – Current]

Bachelor of Software Engineering (Honours)

The Open University of Sri Lanka

City: Colombo | **Country:** Sri Lanka | **Level in EQF:** EQF level 6

- **Core Programming :** Object-Oriented Programming (Java, Python), Data Structures and Algorithms.
- **Software Engineering Practices:** Version control (Git), agile methodologies, and software testing.
- **DevOps & Infrastructure:** Containerization (Docker), Continuous Integration and Deployment (CI/CD), and Linux environments.
- **Web Development:** Full-stack application development, backend frameworks, and web deployment.
- **System Architecture:** API integration, modular system design, and database management.

[21 Mar 2022 – 15 May 2024]

Diploma in English Language and Literature

Aquinas College of Higher Studies

City: Colombo | **Country:** Sri Lanka

- **Spoken Fluency and Collaboration:** Actively engaging in group discussions and team activities to enhance spoken English fluency, active listening, and interpersonal communication.
- **Public Speaking and Presentations:** Developing and delivering structured presentations to confidently articulate ideas to an audience.
- **Grammar and Written Accuracy:** Mastery of advanced English grammar, sentence structure, and vocabulary to produce clear and accurate written work.
- **Literature and Analytical Reading:** Studying literary texts to build strong reading comprehension, critical thinking, and textual analysis skills.

SKILLS

Programming Languages

Java | Python | JavaScript

DevOps & Infrastructure

Docker | Continuous Integration and Continuous Deployment (CI/CD) | Git | Linux | Vercel

Web Development

React | MongoDB | Node.js | Flask

PROJECTS

[9 Apr 2026 – 16 Aug 2026]

LibraryOS - Containerized Backend Architecture

- Developed a fully containerized library management system utilizing a Python and Flask object-oriented backend.
- Architected and implemented a continuous integration and continuous deployment (CI/CD) pipeline using GitHub Actions to automate testing and build processes.
- Packaged the application environment using Docker, ensuring lightweight, consistent execution across both development and production states.

Link: https://github.com/YusanNim21/LibraryOS

[9 Sep 2025 – 13 Oct 2026]

Todo App - Full-Stack MERN with CI/CD Pipeline

- Built a full-stack application using MongoDB, Express, React, and Node.js, structurally separating the frontend and backend into independently containerized services.
- Utilized Docker and Docker Compose for highly consistent local and deployed environments.
- Configured a CI/CD pipeline via GitHub Actions to automate build checks and deployment workflows on every repository push.

[1 Apr 2026 – 7 Apr 2026]

Gamer-Zone - Legacy Project Modernization

- Migrated a foundational HTML/ Tailwind CSS web project into a modern, component-based React architecture.
- Integrated a GitHub Actions pipeline to automate application builds as part of the modernization effort.
